

# Library Management System

Making borrowing and Managing Books Easy!

Rachel Watts

## Problem & Solution:

Problem - Many libraries still use paper or spreadsheets to track books, which is slow and prone to errors.

Solution - Our system allows members and librarians to easily search, borrow, return, and manage books digitally, saving time and reducing errors.

## Key Features:

- Search books by title or author
- Borrow and return books efficiently
- Track borrowed books and due dates
- Add, edit, and remove books
- Receive alerts for overdue books

## System Requirements:

- PC/Laptop, Java, Visual Studio Code
